

Towards a New Town Hall

Please provide your comments on Option A

Respondents	Responses
1	Simple design with lots of windows. Could possibly adjust colors of the walls.
2	To plain
	looks like a dated office building from the picture below.
3	Not hugely fond of the massive ramp that would be required to access the main level of the building from the one side.
4	boring exterior; decent layout; good location
5	outside is very plain; like the environmental considerations
6	Nice concept but is missing the outside space
7	I think this just lacks a friendly appeal. It seems too institutional and lacking character
8	This is my favorite building location and parking setup. I like the exterior, business look, which has eye appeal for now and into the future. It appears to have all the necessary requirements to meet the needs and desires of the employees, to function efficiently. The many entrances allow for quick entrance and exit, especially to the large parking lot to the north for employees and visitors. It doesn't have a "show off" look, which as a taxpayer, I don't want to pay for. The future space (lower level) is a good idea.
9	Not bad just doesn't really have any style to it
10	Very professional welcoming building. Lots of light through the windows. Great location. The green roof is very appealing as well. #1 choice

11	Blah and Boring and the colour is not modern. Appears like the land is uneven from the parking lot to the doors creating slip and fall hazards. Not sure where main entrance is... would be nice to have a big open, welcoming, inviting main entrance with plants, pictures of the trails, lake lisgar fountain, tulip trees planted outside to coincide with our logo. A small fountain outside, and maybe in the floor inside a nice glass tulip leaf with connected, enriched, inspired for all options below as well. Main entrance and parking lot are going together I am assuming for ease of use.
12	This is a central location with lots of parking. The green roof is a great initiative for the Town to support. It is the largest of the 3 which will be needed with all the storage required.
13	Looks like old post office building that used to be downtown
14	No
15	Of the 3 this option seems the most viable. That being said I thought that rental per annum of \$217000 was etrocious \$800000 is absolutely NOT a viable option
16	I like the open accessible stairway to the second floor, the potential for a green roof, and the positioning on the corner except the main entrance doesn't look totally accessible.
17	We are a small town and although we are growing having a right sized building is much more fitting.
18	Building is attractive, good location near post office with ample municipal parking available. It's close to the downtown core but not directly on Broadway which is nice to keep it central but not only focused on Broadway.
19	Not required
20	I like the overall look. Outside public space could be bigger. No dedicated lunchroom that I can see.
21	Plain but modern.
22	how would this benefit the tax payer?
23	Generic modern deco. Will look fantastic new, but will look dated quickly over time.
24	Not enough information. Knowing what the work spaces will look like is essential. Cubicles generally are not an effective solution, however they can be acceptable in some situations. Open concept work environments have proven to be a production deterrent, and a moral killer.

25	not needed, wasted money
26	Town loses a All day parking lot which we are already short on.
27	Don't need it.
28	To plain, not in keeping with the feel/look of Tillsonburg downtown.
29	We don't need a 20-30 million dollars expense to the taxpayer
30	Beautiful looking building, great idea with green space however doesn't represent town image
31	Ugly, no Character, very bland building.
32	What happens to all the parking spaces lost with the creation of the new building?
33	Has the appearance of a municipal building all work and no play!
34	Nice size and design
35	Least favourite. Stale design.
36	This is the most aesthetically pleasing option. But I don't think it is as great for the community as a whole.
37	This would be my preferred option. Looks modern. Green roof is afoot thing.
38	Very generic
39	Option A is boring and looks too much like an administrative building with no character
40	Simple and professional looking building
41	The look is in line with many other buildings in town.
42	too industrial looking, not much community gathering space, doesn't appear to have much parking
43	It takes away from Down town parking
44	NA do we need to spend extra dollars for this?
45	no future expansion built in, appears built for budget with no thought of an enlarging town, town property
46	interesting, contemporary design, more detail and design than option B
