Dear Members of Council, Residents and Ratepayers,

The Long Point Region Conservation Authority had another successful year in 2019 in which we continued to update shoreline and riverine mapping, completed 14 wetland restoration projects, planted over 80,000 trees throughout the watershed, and effectively worked with our municipal emergency management partners through a dozen flood events.

Attached you will find a copy of our 2019 Annual Report highlighting in greater detail the programs, services and accomplishments the Authority achieved in 2019.

Financially, the Authority ended 2019 in a positive financial position and the 2019 LPRCA financial statements audited by MNP LLP of London are attached.

On behalf of the Long Point Region Conservation Authority Board of Directors, I would like to thank you for your continued support of the Authority.

Yours truly,

Judy Maxwell, CPA, CGA
General Manager/Secretary-Treasurer
