THAT the minutes of the Board of Directors Meeting held February 5, 2020 be adopted as circulated.

INTRODUCTION OF THE BOARD OF DIRECTORS

The Board members were asked to rise as their names were called.
CHAIR’S REMARKS

Chair Columbus thanked the municipal partners for their financial support and noted a number of milestones in 2020 including the closing of the lease-to-own agreement with Port Burwell Marina, the hydro and water upgrades occurring at the campground areas and the three current floodplain mapping projects currently underway.

The Chair thanked staff, volunteers, the Vice-Chair and Members for the hard work in 2019 and continued success in 2020.

INTRODUCTION AND GREETINGS FROM SPECIAL GUESTS

The Chair introduced Jeff Helsdon, Constituency Assistant to Toby Barrett, MPP Haldimand-Norfolk; Rick Cerna, Chair, Catfish Creek Conservation Authority; Elizabeth Van Hooren, General Manager, Kettle Creek Conservation Authority; Ed Ketchabaw, Mayor, Municipality of Bayham; Alan Dale, Vice-Chair, Upper Thames Region Conservation Authority; Larry Martin, Mayor, Township of Norwich and Warden, Oxford County; and Dave Beres, Deputy Mayor, Town of Tillsonburg.

AUDIT AND FINANCE COMMITTEE

The Chair called upon Dave Beres, Chair of the Audit and Finance Committee to present the committee report.

After introducing Ashley Didone, Audit Partner of MNP, Chair Beres stated that the Audit and Finance Committee met February 19, 2020 and received and reviewed the financial statements in detail. MNP issued a clean opinion of the Authority’s 2019 financial reports and found that the financial statements fairly presented the Authority’s position.

2019 COMMITTEE REPORTS

a) 2019 ANNUAL REPORT

The GM presented the 2019 annual report and highlighted the many projects, events and achievements of LPRCA over the past year. Shoreline and riverine mapping data were updated, over 80,000 trees were planted, 14 wetland restoration projects were completed, and staff worked with the watershed municipal emergency management partners through 12 flood events.

The GM thanked staff, the board, municipal partners, and the various community partners for their participation and efforts in helping LPRCA improve the environment for those living within the LPRCA watershed.

b) BACKUS MUSEUM COMMITTEE

Chair Betty Chanyi introduced and thanked the Backus Museum Committee for their work and provided a few highlights of the past year including the new Vic Gibbons Gallery and the “At Home at Backus” exhibit about the Backus family immigrating to Canada. The Summer Theatre – Pirates of Long Point event was well attended and the 2-day War of 1812 is always a visitor-favourite event. The Chair made note of the events of 2020 including the new Summer Theatre – The Witches of Long Point and the return of the Masquerade Ball.

Chair Chanyi thanked the staff and board for their support of the museum and heritage program and invited everyone to attend the many events this summer.

c) LEE BROWN MARSH MANAGEMENT COMMITTEE

Chair Tom Haskett reviewed the activities conducted at the Lee Brown Waterfowl Management Area and of the Lee Brown Marsh Management Committee. The committee is very proud to have taken the lead in managing the invasive plant phragmites that is damaging Ontario’s wetlands and beaches and continues to support the Long Point Phragmites Action Alliance. The controlled waterfowl hunting program went very well and was fully booked in 2019. The winner of the Leighton and Betty Brown Scholarship, Zach Peck, was introduced and congratulated for obtaining summer employment in Manitoba with Delta Waterfowl this summer.
Chair Haskett thanked the committee, the board and staff with special mention to Kim Brown, Lee Brown Marsh Manager.

STEWARDSHIP AWARD PRESENTATION

LPRCA encourages everyone to help enhance and protect the watershed and supports private land stewardship. The Conservation Stewardship award was created to recognize those individuals who have acted to enhance and protect the watershed as well as their own properties. The third annual LPRCA Conservation Stewardship Award, presented by Vice-Chair John Scholten, was awarded to Stephen and Katie Hotchkiss for their commitment to positive environmental actions contributing to a more sustainable and healthier watershed.

The Hotchkisses have partnered with LPRCA and the Alternative Land Use Services (ALUS) Elgin to establish more than 40 acres of habitat; they have created four wetlands, 20 acres of forest, and more than 16 acres of pollinator habitat. They regularly share their time and insight with others in the community and have participated in events such as the ALUS Elgin Pollinator Awareness Workshop, ALUS Elgin Planting Days, ALUS Seed Sourcing Workshop and ALUS Elgin Annual Environmental Stewardship Tour.

Mr. and Mrs. Hotchkiss felt honoured to receive this award and to be part of the community as the Carolinian Zone is very unique and important to them. They also felt the need to set an example for other businesses and showcase that it is possible to provide an environmentally beneficial pathway towards a sustainable and economically positive business model.
KEYNOTE PRESENTATION

Dr. Frank Seglenieks, Water Resources Engineer, National Hydrological Service of Canada within Environment and Climate Change Canada was introduced by Chair Columbus. Dr. Seglenieks works out of Burlington, Ontario, pursuing his research interests in hydrological modelling and historical water level data of the Great Lakes. He was also the coordinator of the University of Waterloo Weather Station, a role he continues now on a volunteer basis.

Lake Erie Water Levels: Where are they now and where are they going in the future, a look into the status of the lake whose shore we call home.

In his presentation, Dr. Seglenieks pointed out the various factors required to keep the lake level in balance; the inflows versus the outflows. There is no actual control of inflows and outflows on Lake Erie, and the persistent wet weather conditions across the Great Lakes basin has been the major contributing factor to the continuous high Lake Erie water levels since 2017.

The future of Lake Erie water level depends primarily on the amount of water going into the system. Outflows from all the Great Lakes are at or near record highs and are predicted to remain so for several months. Based on his modelling and research, Dr. Seglenieks said the great lakes have tended to lock into patterns that last between 10 to 15 years of either very low water levels or very high waters levels. We are currently at three years of record highs but it cannot be assumed that the record highs will continue for the next several years. For instance, if there are average weather conditions for the next several months, the models predict that the Lake Erie water level will reach record highs in the next couple of months but the summer months would be lower than 2019.

In conclusion, Dr. Seglenieks said that regulation has a limited role. Nature will do what it wants and we have to adapt through resilient measures for both flooding and drought.

The Chair thanked Dr. Seglenieks for his presentation and then adjourned the meeting at 3:05pm.
