Dear Councillor

We live at [REDACTED], Tillsonburg, and we are opposed to the proposed lithium-ion battery storage facility. We live too close to this site. We are less than a kilometre from the site.

It is not just us, but it affects the whole town.

What I have read about lithium-ion batteries and such facilities, the costs out weigh any benefits the town of Tillsonburg would receive. Yes, a small amount of taxes may look attractive, but the cost fire and pollution can put an enormous strain on the town's fire department and healthcare . As well, I'm thinking of physical and health dangers to the firefighters.

Finally, I just don't see any positive reason to allow this project to proceed.

Thank you
