

December 2025

TO: Mayor Gilvesy, Tillsonburg Councillors, and the Tillsonburg Community

RE: Support for the Proposed Tillsonburg Battery Energy Storage System (BESS)

As a community member and homeowner in Tillsonburg, I am writing to express my support for the proposed Battery Energy Storage System (BESS) at 500 Hwy 3.

Tillsonburg is growing, and with that growth comes increasing demand for reliable, affordable electricity. Modernizing our local grid with technologies like battery energy storage is an important step toward keeping our community strong and resilient. A BESS allows us to store surplus renewable energy and use it when demand is highest, helping to reduce strain on the grid and limit the risk of outages or brownouts.

This project will support both residential and business needs by improving local energy stability, enabling better integration of clean energy, and contributing to long-term cost control. Communities across Ontario are implementing similar systems as part of broader efforts to ensure their power infrastructure keeps up with growth—and Tillsonburg should do the same.

I/we, the undersigned, respectfully encourage Tillsonburg Council to support the proposed Battery Energy Storage System at 500 Hwy 3. This is a forward-looking investment that will benefit the town's reliability, sustainability, and economic future.

Sincerely,

Signed by:
