To the constituents of Tillsonburg and surrounding area,

I am writing to express my strong support for the proposed Battery Energy Storage System (BESS) project being developed by Skyline Energy at 500 Highway 5, Tillsonburg. This project represents a significant investment in your community's future, both economically and environmentally.

The construction and operation of the BESS facility will create good paying jobs for residents of Tillsonburg and neighboring communities. In addition, the construction phase will provide valuable apprenticeship opportunities, enabling young local workers to gain hands-on experience and develop skills that will serve them throughout their careers.

Beyond the immediate economic benefits, this project aligns with our shared commitment to sustainability and energy resilience. By supporting this initiative, we are fostering a cleaner, more reliable energy infrastructure while ensuring that local families and businesses benefit from the opportunities it brings.

I urge you to approve and support the development of this BESS project. It is an investment in your community, and your future.

Thank you for your consideration.

Respectfully,

James Bonnell
